

## Main Luggage Checklist

Each adult or child passenger is allowed to check in up to 20kg (44 lbs) of baggage for free

All check baggage must be properly packaged, able to sustain a certain pressure and able to be safely loaded and transported under normal operations.

The name, full address and contact number of the passenger must be clearly mark both inside and outside of the baggage.

Items that should not be placed in checked baggage: cash, securities, jewelry, precious metals and articles, antiques, scripts and painting, computers, personal electronic items, samples and other valuable objects, fragile or delicate items, perishable goods, lithium batteries, important documents or materials, travel documents and personal medication.

Write your destination hotel on A4 paper in large letters in your check in bag. Chinese domestic flights often only attach the check-in luggage label, not bothering with those small bar code stickers. This piece of paper will help your luggage being found a lot sooner.

Main Luggage		
Checklist – Have I bought or packed ...	Bought	Packed
